

BREEZE CONSULTING

Change made simple

Smart organisation seek out
change, to ***evolve and grow***

Effective and successful change requires
experienced professionals, expertise and
true focus. Without which change will fail.

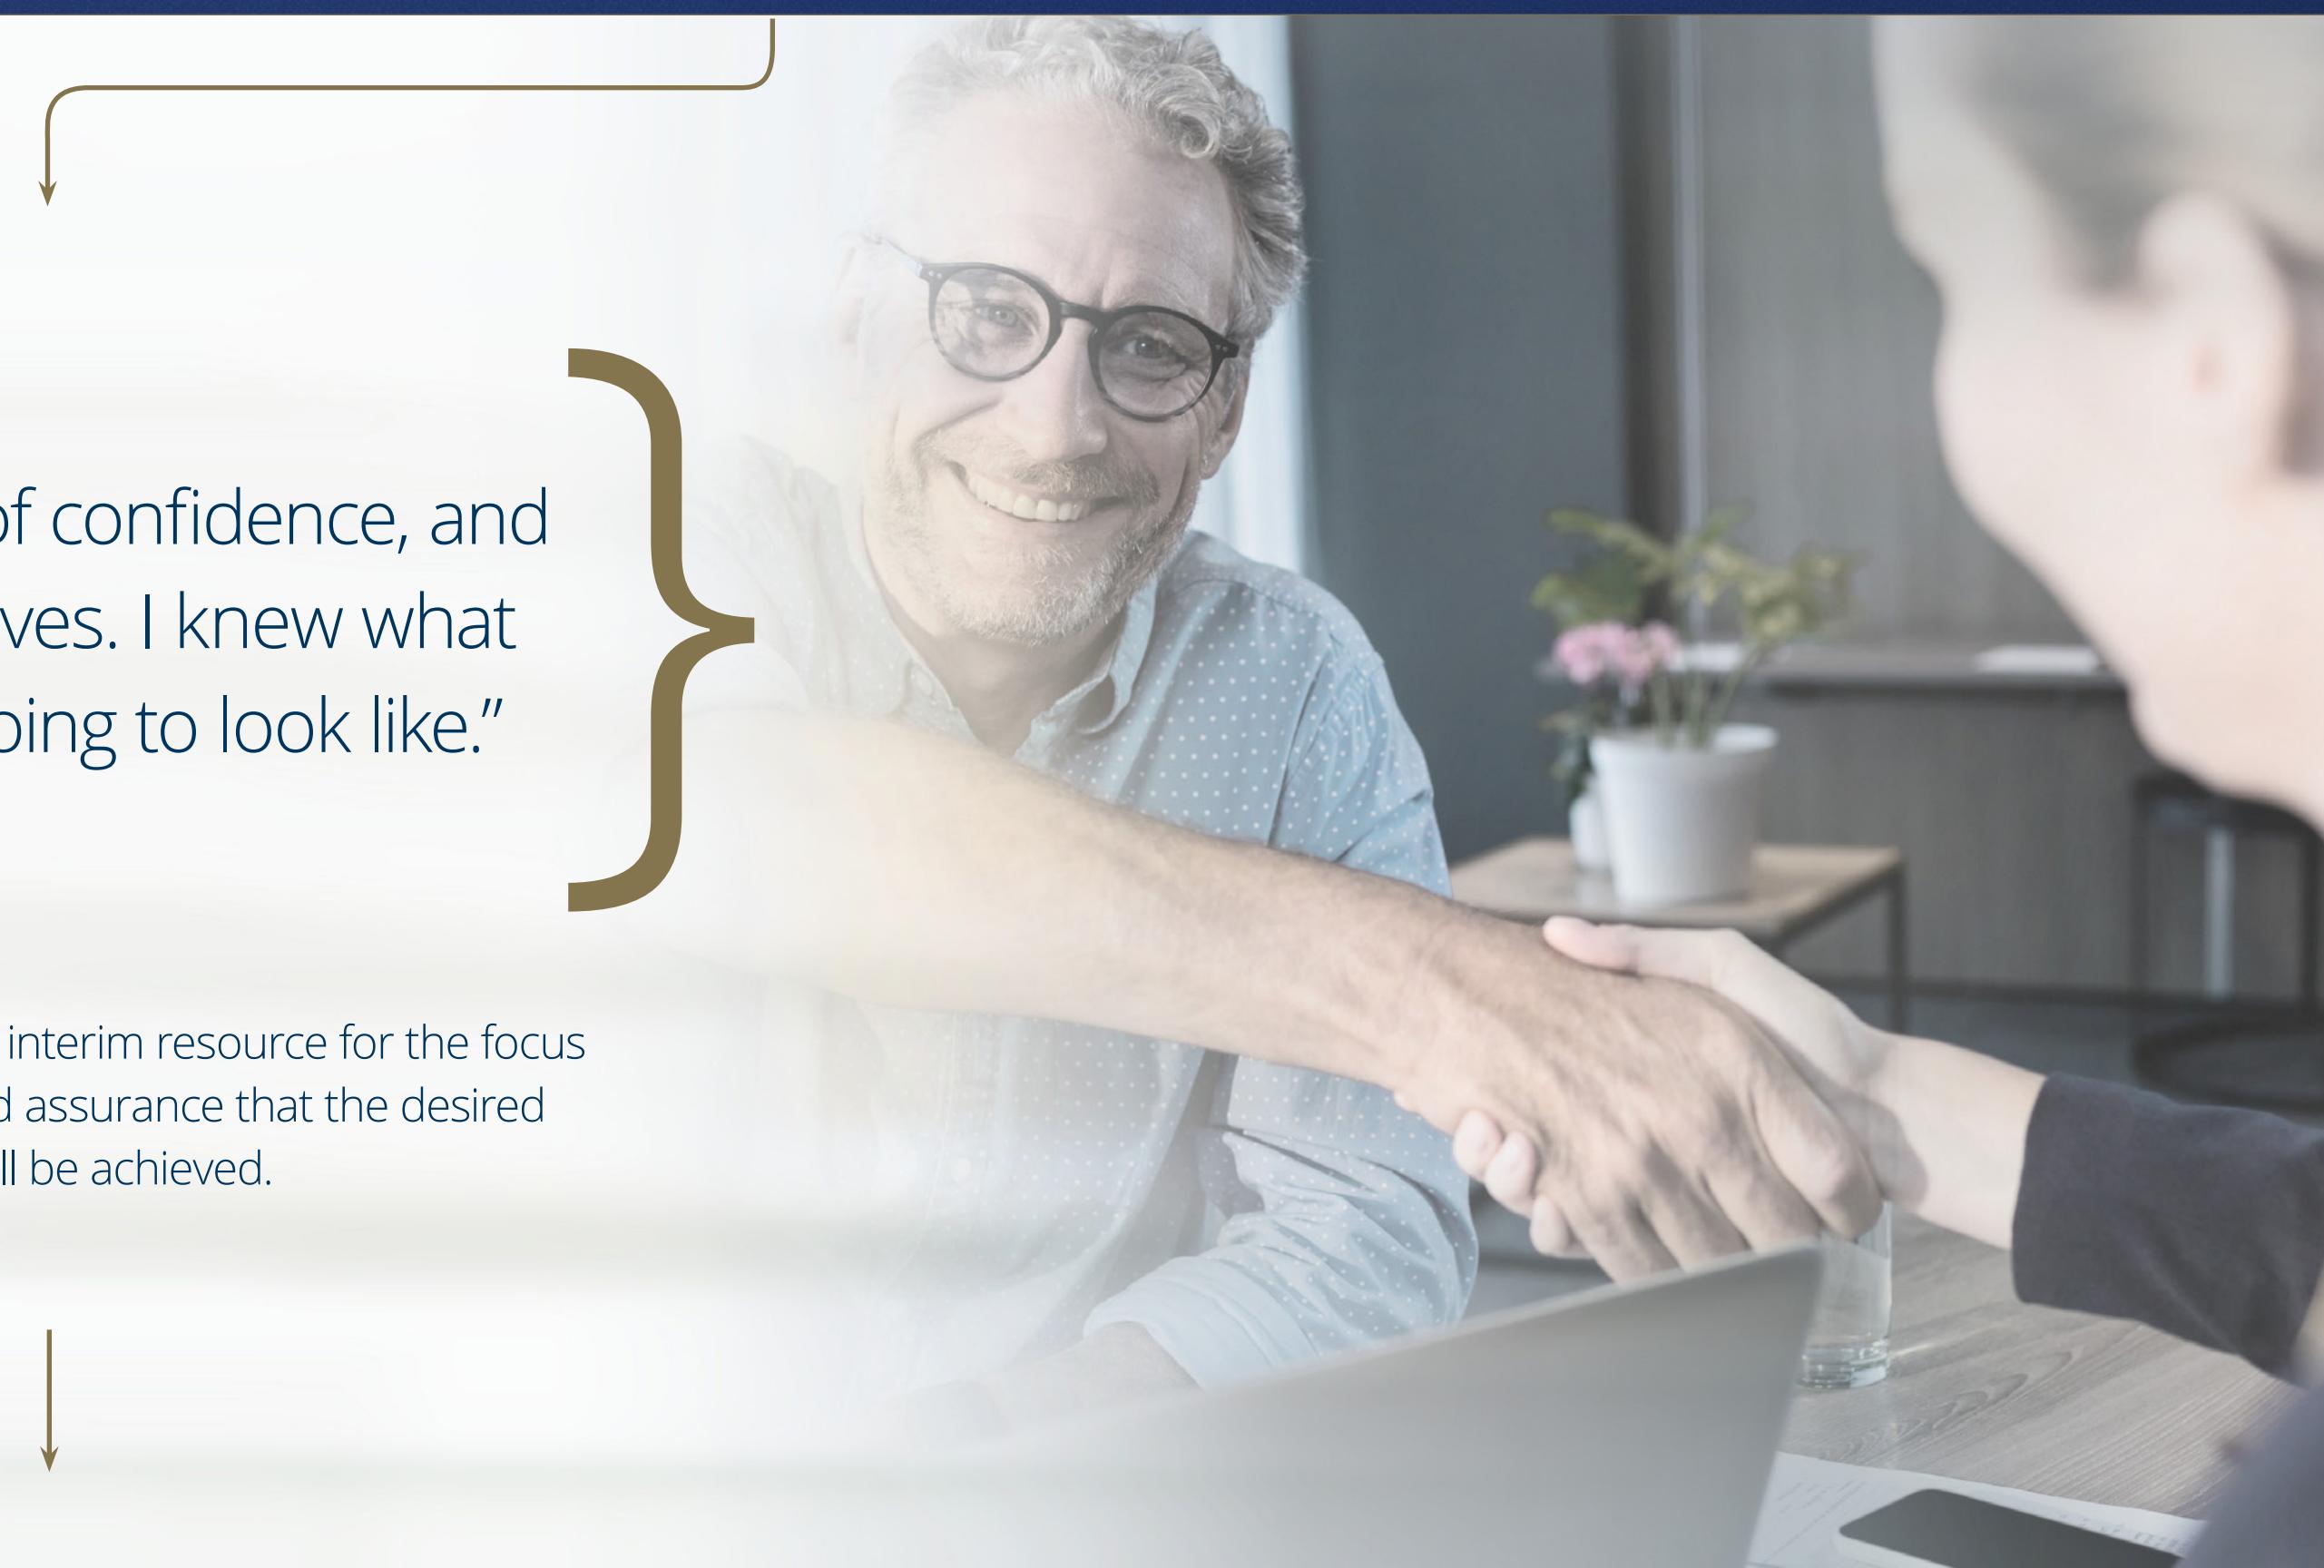

The imperative to run today's operation can draw all the focus of any leader. Leaving little room to focus on tomorrow's operation let alone the change needed to get there.

This is where a fresh approach to change comes in.

“Gave me a lot of confidence, and met my objectives. I knew what success was going to look like.”

Breeze provide a refreshing interim resource for the focus and direction; visibility and assurance that the desired outcome will be achieved.

{ 'Was able to evaluate progress,
reporting and outcomes. Dashboard
used for board and executive team.' }

Breeze collaborate with leaders and leadership teams, and
inject energy. Leaving organisations smarter and more
equipped for the future and more adept at change.

{ 'Provided visibility around achieving success and progress towards it, make the organisation smarter, gave the board assurance that the strategic plan was being addressed and delivered.'

}

Breeze get change done. Visibly. Measurably. Tangibly.
Using proportionate programme and project management
methodologies and a relentless focus on defined
commercial outcomes.

A refreshing approach

‘Consummate professional in project and programme management.’

↓

Our values

Showing everyone **respect** regardless of their agenda or depth of understanding.

Being **honest** with people and about circumstances, change has to start from 'how things are'.

Acting with **integrity**, this is about people's livelihoods

Making the process fulfilling, weighty matters are better achieved when we are also **considerate**

{ 'Highly regarded as a professional and an individual, high integrity and capability and likeable – it adds to acceptability that she has a degree of charm.'
